# Timur Zheltenkov

*Software Engineering Student*

zheltenkovtimur@gmail.com +49 15234640640 Potsdam, Germany timurzheltenkov

timurenko

## PROFILE

Motivated Software Engineering undergraduate with hands-on experience in full-stack web development and IT infrastrucutre. Over 1.5 years of experience building dynamic web applications using ReactJS, ExpressJS, and NextJS and professional IT support experience ensuring smooth system operations. A fast learner currenlty exploring Computer Networks and AI/ML fundamentals, with a keen interest in scalable architectures and intelligent automation

## EXPERIENCE

**Full-Stack Developer** Remote
*Self-Initiated Project, SpektrGroup*
- Designed and developed a CMMS (Computerized Maintenance Management System) web application for a real industrial client using NextJS, enabling tracking of equipment maintenance, downtime, and asset lifecycle.
- Designed and implemented responsive dashboards, user interfaces, RESTful APIs, and role-based authentication using React, NextJS, ExpressJS, and NextAuth.
- Collaborated directly with stakeholders to understand requirements, refine workflows, and deliver a maintainable, scalable solution tailored to real-world user needs.

**IT Support Specialist** 2024 – Present
*GUS Germany GmbH* Potsdam
- Provided first-line technical support for hardware, software, and network-related issues, maintaining 99% uptime for internal systems.
- Assisted in deploying new workstations and implementing system upgrades.
- Gained hands-on experience with network troubleshooting, scripting automation, and user training.

**Network & System Engineer Intern** 04/2026 – 06/2026
*GUS Germany GmbH* Berlin, Germany
- Managed Microsoft Azure Active Directory user accounts, licenses, and student identity data; developed a JavaScript/Microsoft Graph API automation tool to remove licenses for withdrawn students, reducing processing time from ~90 minutes to under 10 minutes per cycle.
- Configured and maintained Fortinet FortiGate firewall policies while troubleshooting campus-wide Wi-Fi issues and supporting the migration of IoT devices to appropriate network segments.
- Contributed to the planning and preparation of a new firewall architecture for the university's future network environment.

## EDUCATION

**Bachelor of Science in Software Engineering** 2023 – Present
*GISMA University Of Applied Sciences* Potsdam, Germany

**General IT/Software Development Education** 09/2018 – 09/2021
*STEP IT Academy* Baku, Azerbaijan

## TECHNICAL SKILLS

**UI/UX & Design**
Figma, Canva, UI Design, Responsive Design, Design Systems, Prototyping

**Frontend**
ReactJS, NextJS, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Material UI

**Backend**
ExpressJS, REST APIs, DrizzleORM, Gin

**Database**
PostgreSQL, MySQL

**Languages**
Python, Java, TypeScript, Golang

**Dev Tools**
Git, VS Code, Docker (basic), Postman

**Learning**
Computer Networks, Cybersecurity, Machine Learning Fundamentals

**AI & Productivity Tools**
Generative AI Tools, AI-assisted design and development

## LANGUAGES

**English**
Fluent

**German**
B1

**Russian**
Fluent

**Azerbaijani**
Native

## PROJECTS

**CMMS Web App (NextJS)**
Industrial-grade maintenance management system for real-world equipment tracking. Integrated asset management, maintenance scheduling, and analytics dashboards. Built with NextJS, Express, and PostgreSQL.

**Other Projects**
**Operating System Simulator (Java).** Developed a desktop application that simulates core operating system components, including CPU scheduling, RAM and HDD management, memory allocation, and process execution. Implemented detailed visualization of data flow between storage, memory, and CPU to demonstrate low-level operating system concepts and resource management.
**Autonomous Stock Trading Bot (Java).** Built an automated trading bot that integrates with the Alpaca Trading API to retrieve live market data and execute trades. Implemented technical indicators and algorithmic trading strategies to analyze price movements, evaluate market conditions, and autonomously place buy/sell orders based on predefined decision models.
**Microsoft License Management Automation (JavaScript).** Developed an internal automation tool for university IT operations that removes Microsoft 365 licenses from suspended student accounts. Automated a previously manual administrative workflow, reducing processing time from over one hour to approximately ten minutes while minimizing human error and improving operational efficiency.

## INTERESTS

Cloud Computing, AI-driven systems, Cybersecurity, Industrial Automation, Open Source, UX-focused Design
